InsureMyNation Privacy Policy

Oct 29, 2026 · @Jayesh

1. About this policy

This policy explains what personal data InsureMyNation collects, why we collect it, who we share it with, and the choices you have. It applies when you visit our website, chat with our AI insurance advisor, message us on WhatsApp, or speak to our team.

It covers website visitors, people who ask for quotes or advice, our customers and their family members, and anyone who contacts us. Please read it before you share your details with us. Where we rely on your consent, we ask for it clearly and separately, and you can withdraw it at any time (see Section 7).

2. Who we are

InsureNation ("InsureMyNation", "we", "us") is an insurance broker registered with the Insurance Regulatory and Development Authority of India (IRDAI) as a Direct Broker, registration code IRDAI/DB 1093/2023. Our registered office is at 808, Arunachal Building, Barakhamba Road, Connaught Place, New Delhi 110001.

We decide why and how your personal data is processed, so we are the Data Fiduciary for it under Indian law. We operate the website www.insuremynation.com, our WhatsApp number +91 99101 69789, and our AI insurance advisor, Asha, together called the "Platform".

As a broker, we help you compare and buy insurance from insurers we work with. The insurer that issues your policy also processes your data under its own privacy policy.

3. Laws we follow

This policy is written to meet:

- the Digital Personal Data Protection Act, 2023 and the Digital Personal Data Protection Rules, 2025 (together, "DPDP law");
- the Information Technology Act, 2000 and the rules made under it, including the Reasonable Security Practices and Procedures and Sensitive Personal Data or Information Rules, 2011, to the extent they still apply;

- IRDAI regulations that apply to insurance brokers, including rules on record keeping, customer information, and protection of policyholders' interests.

Where these laws require us to keep or disclose information, we follow the law even if this policy says otherwise.

4. Information we collect

We collect only what we need to advise you, arrange your insurance, and service it. Some of it is about family members or others you want to insure; please share their details only if they know you are doing so.

Type of data	Examples	How we get it
Contact and identity	Name, mobile number, email, city, date of birth or age, gender	You, through forms, the AI advisor, WhatsApp or calls
People to be insured	Relation to you (spouse, child, parent), their ages, who needs cover	You, mostly through the AI advisor
Health information	Existing conditions, medical history, lifestyle details, medical reports	You, when you ask about or apply for health or life cover
Policy and claim records	Quotes, proposals, policies bought, renewals, claims you ask us to help with	You, and the insurers we work with
Conversation records	Chat messages, WhatsApp messages, hand-over summaries, call notes	You, and our team
Technical data	IP address, device and browser type, pages visited, cookie and device identifiers	Automatically, when you use the Platform

We do not ask for, and our AI advisor is built to refuse, card numbers, passwords, and one-time passwords (OTPs). You pay premiums directly through the insurer's payment gateway, so we never receive or store your card or bank details.

5. Our AI insurance advisor

Our chat advisor, Asha, is an AI system, not a person. It is available on our website, and it hands you to a member of our team whenever you ask or when it cannot help.

What it captures

- Your messages, in the language you write in.
- The people your message is about (for example "me, my wife and my father"), how they relate to you, and details you state about them, such as age or a health condition.
- Whether you stated a detail as a fact or only as a "what if", so that hypothetical questions are not saved as facts about you.
- What you are asking, the topic, and the tone of the conversation, so it can reply appropriately.
- Your name and phone number, if you ask for a call back or are handed to our team.

How it works with your data

- **Memory within a chat.** It keeps a record of each conversation: the people and details mentioned, questions asked, options discussed, and short notes. If you correct a detail, the new value is used and the old one is kept in the record's history.
- **Memory across chats.** By default, your details do not carry over to a new chat. If you sign in, we may switch this on for your account so you don't have to repeat your details; we will tell you before we do.
- **Recognising you.** If you are not signed in, we set a device cookie so your chat history stays with your browser.
- **Checking options.** Plain software rules, not AI, check each plan's printed eligibility rules (such as entry age) against the people you describe and rank the options fairly. The advisor gives information and suggestions; the insurer makes the final decision on whether to offer you cover and at what premium.
- **Decision record.** For each recommendation, the system keeps a private note of which options it considered and why. Our team can review it to check the advice was fair.
- **Hand-over.** Before passing you to our team, it asks for your name and phone number (at most three times) and respects a "please do not contact me". Our team receives a short summary of the conversation.

AI service providers

To understand and answer your messages, the conversation is sent to AI models run by outside companies: Anthropic (Claude), which runs the advisor, and OpenAI, which converts text into search data so earlier parts of a chat and relevant documents can be found. These companies process the data only on our instructions and may do so on servers outside India (see Section 8). If we add or change an AI provider, we will update this list.

Using conversations to improve the advisor

We store chat transcripts and may review them, including by members of our team or our technology partner Continuum Core Pvt. Ltd., to check accuracy, fix mistakes, and improve the advisor's answers. We do not allow our AI providers to train their own models on your conversations. Our system logs hide email addresses and phone numbers.

AI can make mistakes. Please check important details, such as coverage and exclusions, against the policy wording or with our team before you buy.

6. How we use your information

We use your data only for the purposes below, and we tell you the purpose when we ask for it.

Purpose	Basis
Answer your questions and suggest suitable insurance options	Your consent
Get quotes from insurers and submit your proposal	Your consent, and to arrange the policy you asked for
Service your policy: renewals, changes, and help with claims	Your consent, and to provide the service you bought
Call you back or hand your chat to our team	Your consent, given when you share your number
Send service messages, such as renewal reminders and policy documents	Your consent, and our duties to policyholders

Purpose	Basis
Send offers and product updates on WhatsApp	Your separate consent, which you can withdraw at any time
Review chats to check advice quality and improve the AI advisor	Your consent
Measure and improve our website and ads	Your consent to non-essential cookies (Section 9)
Prevent fraud and misuse, and keep the Platform secure	Legitimate uses allowed by law
Keep records and respond to IRDAI, courts, or other authorities	Legal obligation

We do not sell your personal data. We do not use your health information for marketing.

7. Your consent and how we contact you

When you start a chat, fill a form, or share your number, we show a short notice and ask for your consent for the purposes listed in Section 6. Consent for marketing is asked separately and is never a condition for getting advice or buying a policy.

How we contact you. We send service messages (quotes, policy documents, renewal reminders, claim updates) and, if you agree, offers and product updates on WhatsApp. Our team may also call you when you ask for a call back or are handed over from the AI advisor.

Do Not Disturb. If your number is registered on the National Customer Preference Register (DND), we will send promotional messages only where you have given us explicit consent, as allowed by TRAI's rules. Service and transactional messages about a policy or request you made are not affected.

Withdrawing consent. You can withdraw any consent at any time, as easily as you gave it:

- reply "STOP" to any WhatsApp message from us to stop marketing messages;
- tell the AI advisor or our team that you do not want to be contacted;
- email nehal@insuremynation.com.

We act on your request within 7 working days. Withdrawing consent does not affect processing already done. If you withdraw consent we need to service an active policy, we may not be able to keep helping with it, and we will tell you if so.

8. Who we share your data with

We share your data only as needed for the purposes in Section 6.

Who	What they receive	Why
Insurers we work with	Details needed for quotes, proposals, policy issuance, renewals and claims	To arrange and service your insurance
Our technology partner, Continuum Core Pvt. Ltd.	Data held on the Platform, including chat records	To build, host, run and support the Platform and AI advisor on our behalf
AI providers: Anthropic and OpenAI	Chat messages and related context	To understand and answer your messages (Section 5)
Meta (WhatsApp)	Your WhatsApp number and the messages you exchange with us	To deliver messages between you and our team
Meta and Google (advertising and analytics)	Cookie and device data, and the pages you visit	To measure and improve our website and ads, only with your cookie consent
Regulators, courts and law enforcement	What the law requires	To comply with IRDAI rules, court orders and other legal duties
A buyer or merged business	Your data, under this policy	If our business is sold or merged

Everyone who processes data for us does so under a written contract, only on our instructions, with security safeguards, and must delete or return the data when the work ends.

Data outside India. Some of these providers, including our AI providers, may process your data outside India. We transfer data only to countries the Government of India has not restricted, and we require the same level of protection there.

9. Cookies and tracking

Cookies are small files stored in your browser. We use three kinds:

Kind	Examples	Can you turn it off?
Essential	Sign-in cookie; device cookie that keeps your AI advisor chat history; security and spam protection	No, the Platform needs them to work
Analytics	Google Analytics, to see which pages are used and how	Yes
Advertising	Meta Pixel and Google Ads, to measure our ads and show you relevant ads on other sites	Yes

We load analytics and advertising cookies only after you agree in our cookie banner. To change your choice later, block or delete cookies in your browser settings. You can also limit personalised ads through Google's Ads Settings and Meta's ad preferences. We do not pass the content of your chats or your health information to advertising tools.

10. How we protect your data

We use reasonable technical and organisational safeguards, including:

- encryption of data in transit, and of stored secrets such as access keys;
- access only for team members who need it, with individual permissions;
- an audit trail of changes and of access to sensitive records, which cannot be edited or deleted;
- hiding email addresses and phone numbers in system logs;
- an AI advisor built to refuse card numbers, passwords and OTPs;
- written security and confidentiality terms with every provider who handles your data.

No system is completely secure. If a breach affects your personal data, we will tell you without delay, explaining what happened, the likely impact, and what you can do. We will also report it to the Data Protection Board of India and other authorities as the law requires.

Please keep your login details private. We will never ask for your password or OTP by phone, email or WhatsApp.

11. Your rights

Under DPDP law, you have the right to:

- **Know** what personal data we hold about you, how we use it, and who we have shared it with.
- **Correct and update** data that is wrong, incomplete or out of date.
- **Erase** data we no longer need, unless the law requires us to keep it.
- **Withdraw consent** at any time (Section 7).
- **Nominate** someone to exercise your rights if you die or become unable to do so.
- **Complain** to us, and then to the Data Protection Board of India if you are not satisfied (Section 13).

To use any of these rights, email nehal@insuremynation.com or write to the Grievance Officer in Section 13. We may ask you to confirm your identity first. We will respond within 30 days.

12. Children's data

The Platform is meant for adults. We do not knowingly let anyone under 18 use the AI advisor or buy a policy on their own.

Parents and legal guardians often share a child's details (such as age or health) to insure them under a family plan. When you do, you confirm that you are the child's parent or lawful guardian and consent on the child's behalf. We use a child's data only to arrange and service their cover, never for advertising, profiling or behavioural tracking.

If you believe a child has shared data with us without a parent's consent, contact us and we will delete it.

13. Questions and complaints

For any question, request or complaint about your personal data, contact our Grievance Officer, who also answers questions about how we process data:

Nehal Kumar, Co-founder and Chief Executive Officer InsureNation 808, Arunachal Building, Barakhamba Road, Connaught Place, New Delhi 110001 Email: nehal@insuremynation.com Phone: +91 99101 69789 (Monday to Saturday, 10 am to 6 pm)

We acknowledge complaints within 48 hours and resolve them within 30 days. If you are not satisfied with our response, you can complain to the Data Protection Board of India.

For complaints about an insurance policy or claim (not about your data), you can also use our claim support page, the insurer's grievance team, IRDAI's Bima Bharosa portal, or the Insurance Ombudsman.

14. Changes to this policy

We may update this policy when our services, the AI advisor, or the law changes. We will post the new version here with a new date. If a change affects how we use data you have already given us, we will tell you on the Platform or by WhatsApp or email, and ask for fresh consent where the law requires it.

Effective date: 22 October 2026 **Last updated:** 22 October 2026
